

M-D Pneumatics™

EQUALIZER® RM

Rotary Positive Blowers

Models: • 4606 • 4609 • 4612
• 6012 • 6016 • 6024

Bi-directional Rotation

17 Series - Horizontal Air Flow

46 Series - Vertical Air Flow

Designed to be interchangeable with equivalent Roots™ RAM™ models, **EQUALIZER RM** rotary positive blowers offer many distinct advantages when compared to other brands:

Helical Gearing

EQUALIZER RM blowers are timed with hardened, precision helical gears, keyed to the rotor shafts. Helical gearing reduces backlash and mechanical noise as compared to spur gears offered by other manufacturers. Keyed interference fit reduces the risk of slippage of the gear on the shaft and loss of timing, one of the leading causes of blower failure.

Single Piece Housing

Every **EQUALIZER RM** blower includes a housing constructed of a single piece of precision machined cast iron, rather than a two piece housing which is subject to misalignment and loss of operating clearances.

Rotors with Integral Shafts

EQUALIZER RM blowers include precision machined and dynamically balanced ductile iron rotors with large, integrally cast shafts to provide a single unitized rotor to prevent clash as a result of the impeller moving on its shaft.

Positive End Clearances

End clearances are **positively established** and **locked in** at the blower gear end, eliminating the risk of shifting end clearances. End clearances are not “floating”, and allowing incidental contact between rotors and end plates. “Floating” end clearances can result in unnecessary rotor and end plate wear, reducing flow performance and shortening overall blower life.

Polished Sealing Surfaces

All shaft surfaces in contact with sealing members are polished to reduce seal wear and risk of leakage.

Individually Tested

Every **EQUALIZER RM** blower is factory tested to assure you of the highest quality. Tuthill Vacuum & Blower Systems goes the distance to insure that your blower meets our rigid ISO 9001 registered quality standards.

ISO 9001 Registration

EQUALIZER RM blowers are manufactured under Tuthill Vacuum & Blower Systems' ISO 9001 registered quality assurance program, the first American manufacturer of rotary blowers to gain such international recognition.

Versatility

Flow configuration is field convertible from horizontal to vertical flow, or vice versa without replacement of end plates.

Metric Availability

All **EQUALIZER RM** blowers are available with metric drive shaft and process connections.

Worldwide Sales and Service

With sales offices and service facilities located on six continents, you can be assured of availability and service for your **EQUALIZER RM** blowers.

Material Specifications:

Housing: Cast iron

End Plates: Cast iron

End Covers: Cast iron

Rotors: Ductile iron

Shafts: Ductile iron cast integrally with rotors

Bearings: Gear end - Double row ball

Drive end - Cylindrical roller

Drive Shaft: Ductile iron cast integrally with drive rotor

Gears: Heat treated alloy steel, helical cut

Seals: Lip and piston ring labyrinth type on rotor shafts;

lip seal on the drive shaft

Lubrication: Oil splash system, both ends

Gastight and Elevated Pressure Designs

Refer to Tuthill Vacuum & Blower Systems 4000/5500 PD PLUS® and 4100/5600 AcousticAir™ specification sheets for additional information on these features.

Performance

Pressure performance is based on inlet conditions of 14.70 PSIA and 70° F.

Vacuum performance is based on inlet temperature of 70° F and discharge pressure of 14.70 PSIA.

In conjunction with our program of continuous testing and upgrading, all specifications are subject to change without notice.

All data are approximate. Request a quotation for your specific application.

Horizontal Flow (17 series)

Vertical Flow (46 series)
