

Rotary Positive Displacement Blowers

- **High Pressure, Low Noise Industrial Blowers**
- **Bi-Directional Rotation / Horizontal and Vertical Airflow**
- **High Efficiency at high pressure and vacuum**
- **18 psi or 17" hg dry vacuum**
- **Flows to 2030 cfm at 5 psi**
- **Speed to 3600 rpm**

The **QX** is one of the industry's quietest blowers.

Helical Gearing

QX blowers utilize precision helical gears, keyed to the rotor shafts. Helical gears are quieter reducing mechanical noise.

Bearings

All **QX** blowers include double ball bearings on the timing gear end. For additional strength single roller bearings are used on the drive shaft end of the machine.

Featuring the largest bearings available, **QX** blowers have L10 bearing life of up to 200,000 hours.

Rotors

QX blowers are available in tri-lobe variation. The tri-lobe variation offers reduced pulsation and lower noise levels. For vibration free operation all rotors are dynamically balanced. Shafts are integral to the rotors, which prevents loosening over time.

Seals

QX blowers are fitted as standard with piston ring labyrinth process/oil seals. Piston ring seals provide high efficiency, long life and reliability.

The oil chamber is vented to atmosphere providing oil-free air.

Lubrication

QX blowers have oil lubrication on both ends with easy to see sight glasses allowing quick maintenance.

Individually Tested

Every **QX** blower is factory tested to assure you of the highest quality.

ISO 9001 Registration

QX blowers are manufactured under the Tuthill Vacuum & Blower Systems ISO 9001 registered quality assurance program. We go the distance to insure that your blower meets our rigid quality standards.

Warranty

Every **QX** blower is backed by the Tuthill Vacuum & Blower Systems limited warranty for a period of 24 months after installation or 30 months after original blower shipment, whichever occurs first.

Worldwide Sales and Service

With sales offices and service facilities located on six continents, you can be assured of availability and service for your **QX** blowers.

Material Specifications:

Housing:	Cast iron
End Plates:	Cast iron
End Cover:	Cast iron
Rotors:	Ductile iron
Shafts:	Ductile iron, cast integrally with rotors
Bearings:	GE - Double row ball FE - Single Row Cylindrical
Gears:	Heat treated alloy steel, helical cut
Seals:	Piston Ring Labyrinth

Performance Tables — Pressure (14.70 PSIA and 70° F Inlet)

In conjunction with our program of continuous testing and design upgrading, all specifications are subject to change without notice. All data are approximate. Request a quotation for your specific application.
